Load 'n sign

A DEDICATED APP FOR HAULIERS DESIGNED FOR LOADING COMPANIES

VEI

Load 'n sign

A PAPER FREE LOADING DOCKET

Load 'n sign is the ideal instrument to manage loading documents replacing the old hard copy system; imagine directly having the loading documents on your smartphone, but above all, the possibility of signing them and consulting the log of loads transported by you at any time.

Your smartphone must have an internet connection via a local Wi-Fi network or using the mobile network.

The loading company must have an account on iPotweb.com and have the **Load 'n sign** service enabled.

SIMPLIFICATION IS KEY TO LOAD 'N SIGN

- Enable the GPS on your smartphone
- Create your profile by entering the number plates of the vehicles you drive
- Save your signature

Good, now you are ready to drive to your destinations and you will always have your loads log.
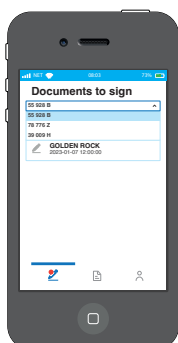

WHY SHOULD GPS BE ENABLED?

Receive the loading documents for transport only when you are on the loading site.

HOW CAN I CREATE MY PROFILE?
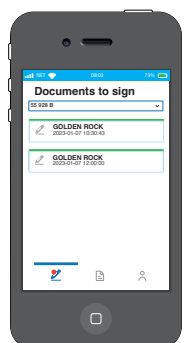

A few steps, at little information.

- Register with email or mobile phone
- Receive an access code
- Photograph or type the vehicle number plate to save it
- Create your signature

HOW CAN I RECEIVE THE TRANSPORT DOCUMENT?

- Select the number plate, i.e. the vehicle you are driving

- Scroll down to update and open the document you want to sign
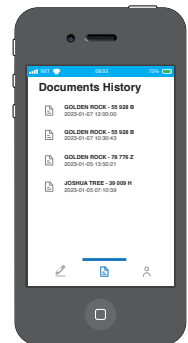

LOAD, SIGN AND GO

- Ensure the document is correct before signing it

HOW DO I DISPLAY MY TRAVEL HISTORY?
It is always possible, in the history section

WHAT DOES THE LOADING COMPANY RECEIVE?

On the iPotweb.com cloud in the Loading Movements section, each movement from the VEI weighing systems will display an icon to identify that the document has been signed. It will therefore be possible for all the parties involved to display and download the transport document signed in PDF format. The document remains in the cloud archive until it is eliminated, which can only be done manually.

Loading Movements #242 (Grand total 1.283.126 kg)

		Start of loading	End of loading	Weight (kg)	Vehicle	Product	Customer	Destination	Carrier	Operator	Loading company
		04/04/23 07:40:47	04/04/23 07:40:59	31.500	FP660HN	SAND	VISCONTI SPA	CANTIERE ABBASANTA	EUROTRASPORTI		

WHY USE LOAD 'N SIGN?

An App specifically for hauliers, easy to use, designed for loading companies' needs where automation is key to loading processes.
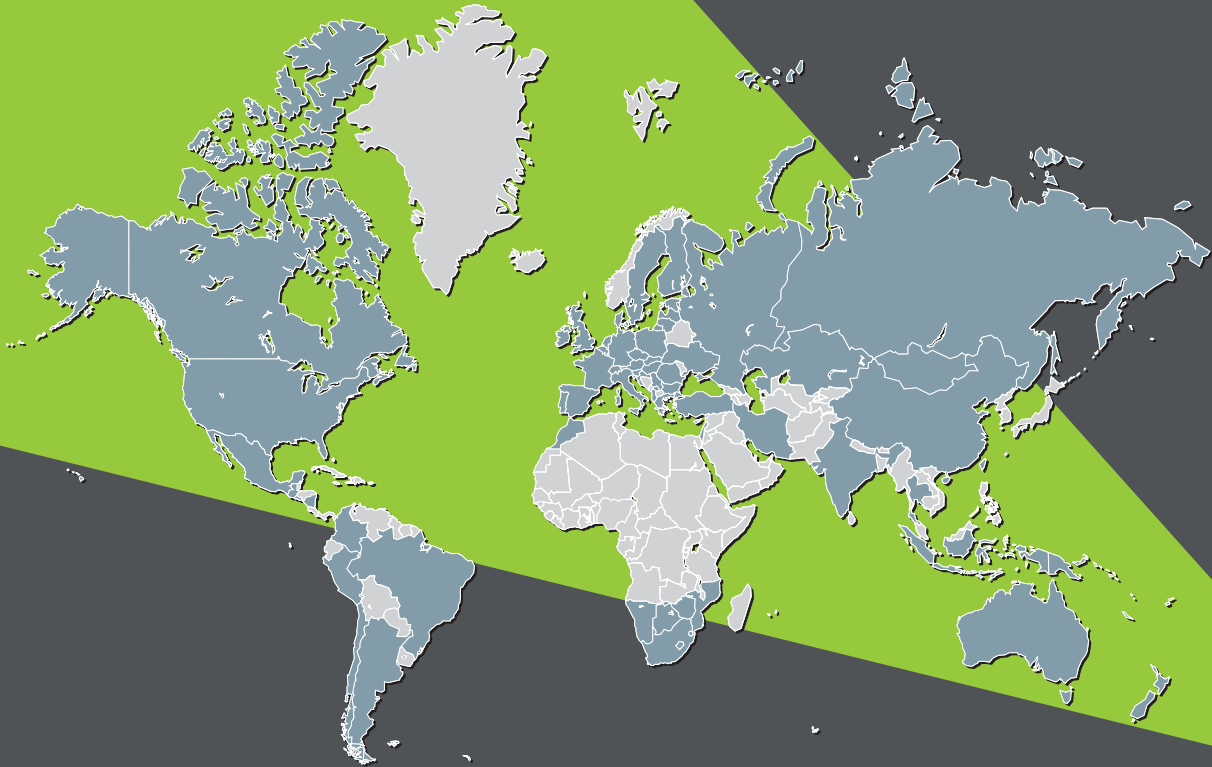

By doing so, the hauliers will be able to remain in the vehicle without having to get out on the loading site, therefore maintaining safety standards and assuring a dynamic and efficient flow of the entrances and exits inside the loading site.
